ABOUT 2030VISION

2030Vision is a partnership that connects businesses, NGOs and governments with the technology and expertise they need to realize the UN Sustainable Development Goals (the Global Goals). It responds to the ambitious vision presented in the 2030 Agenda for Sustainable Development to end poverty, protect the planet and ensure prosperity for all.

Meeting the Global Goals also offers the greatest business opportunity of our time, with estimated annual revenue opportunities and cost savings of \$12 trillion by 2030.

Achieving the Goals and unlocking the commercial potential will only be possible through collaboration. 2030Vision is such a collaboration. It is a unique, unprecedented, exciting initiative founded to propel technology forward in pursuit of the Goals at the scale we need. Our ambition is to transform the use of technology so that all people can live their lives to their full potential by 2030.

2030Vision is open to businesses, NGOs, academia and governments. We are seeking engagement from new Patrons, Partners and Supporters who are committed to ensuring technology delivers for the Global Goals.

HOW WE WORK

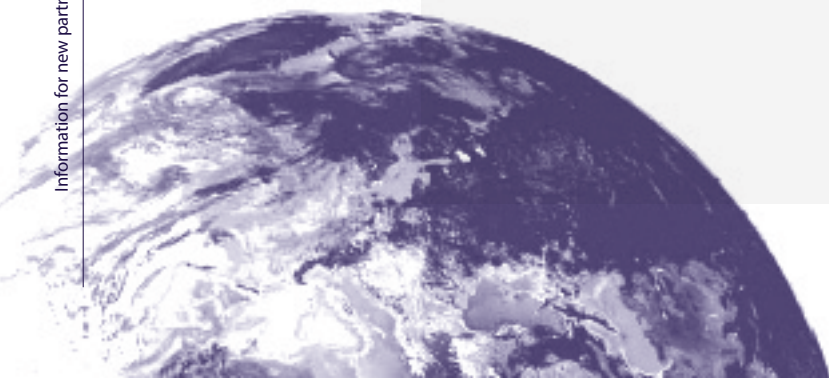

2030Vision is designed to foster:

- **Collaboration** – enabling understanding of the need for, and role of, technology for the Global Goals
- **Innovation** – in the design and deployment of technology
- **Implementation** – through new partnerships across the globe
- **Investment** – in innovations to deliver the Global Goals.

WHAT WE DO

We will work together to raise corporate awareness, carry out new research, and identify or establish projects that demonstrate the positive impact of technology on the Global Goals. We will:

- **Convene** cross-sector leaders to raise awareness of the Global Goals, and ways organisations can advance progress to meet them
- **Research** independent research showcasing thought leadership, the role of technology in addressing the Global Goals, and identification of related market opportunities
- **Deliver** identify and scale-up impactful technologies through multi-sector partnerships; connecting knowledge, expertise, technologies and resources to identified needs.

BENEFITS OF JOINING 2030 VISION

2030Vision welcomes new Patrons, who provide financial support; Partners, who are actively engaged in delivering 2030Vision projects; and Supporters, who support its overall aims.

Benefit	Patron	Partner	Supporter
Collaborate with prestigious cross-sector groups	✓	✓	✓
